This is a list of notable content management systems that are used to organize and facilitate collaborative content creation. Many of them are built on top of separate content management frameworks

### **List of content management systems - Wikipedia**

A web content management system (WCM or WCMS) is a software content management system (CMS) specifically for web content. It provides website authoring, collaboration, and administration tools that help users with little knowledge of web programming languages or markup languages create and manage website content. A WCMS provides the foundation for collaboration, providing users the ability to ...

If mono-channel burners are replaced by modern multi-channel burners, fuel can be saved because the latter require a significantly lower primary (burner) air. While mono-channel burners need primary air ratios of 20-25 (excess air ratios for Indian plants are reported to be between 15-25%), modern multi-channel burners are

operated with around 10-12%.
